petro modernity is a local phenomenon essential to the history of kuwait while also a global experience and one of the prime sources of climate change the book

investigates petroleum's role in the visual culture of Kuwait to understand the intersecting ideologies of modernization, political representation and oil. The notion of iridescence, the ambiguous yet mesmerizing effect of a rainbowlike color play, serves as an analytical aesthetic concept to discuss petroleum's ambiguous contribution to modernity, both promise of prosperity and destructive force of socio-cultural and ecological environments. Covering a broad spectrum of historical material from aerial and color photography, visual arts, postage stamps and master plans to architecture and also contemporary art from the Gulf, it dismantles petro-modernity's visual legacy.

Situated between two continents, the Turkish Republic emerged in 1923 as the successor to the multinational Ottoman Empire, a young secular republic with an old history. Turkey is a diverse and complex country in terms of social composition, politics, culture and economy, where cultures and races coexist. This dynamism is apparent in Turkey's economy with its rapidly developing financial markets, an energetic entrepreneurial class, a thriving industrial base and fast-growing communications. Today Turkey is striving to consolidate its democracy but it also faces other challenges. On the one hand it wishes to maintain its Islamic tradition but on the other it desires to be part of the West. In addition it seeks to find a balance between its traditional role in Western defence strategy and its new regional role in the Middle East, Eastern Europe, the Caucasus and Central Asia. This bibliography fully updates the original volume published in 1982.
