generally in any human field a smarandache structure on a set  $a$  means a weak structure  $w$  on  $a$  such that there exists a proper subset  $b$  in  $a$  which is embedded with a stronger structure  $s$  these types of structures occur in our everyday life that's why we study them in this book thus as a particular case a non associative ring is a non empty set  $r$  together with two binary operations and such that  $r$  is an additive abelian group and  $r$  is a groupoid for all  $a, b, c$  in  $r$  we have  $a \cdot b \cdot c = a \cdot (b \cdot c)$  and  $c \cdot (a \cdot b) = (c \cdot a) \cdot b$  a smarandache non associative ring is a non associative ring  $r$

which has a proper subset  $p$  in  $r$  that is an associative ring with respect to the same binary operations on  $r$

the need for a comprehensive survey type exposition on formal languages and related mainstream areas of computer science has been evident for some years in the early 1970s when the book formal languages by the second mentioned editor appeared it was still quite feasible to write a comprehensive book with that title and include also topics of current research interest this would not be possible anymore a standard sized book on formal languages would either have to stay on a fairly low level or else be specialized and restricted to some narrow sector of the field the setup becomes drastically different in a collection of contributions where the best authorities in the world join forces each of them concentrating on their own areas of specialization the present three volume handbook constitutes such a unique collection in these three volumes we present the current state of the art in formal language theory we were most satisfied with the enthusiastic response given to our request for contributions by specialists representing various subfields the need for a handbook of formal languages was in many answers expressed in different ways as an easily accessible historical reference a general source of information an overall course aid and a compact collection of material for self study we are convinced that the final result will satisfy such various needs
